Introduction to User Administration

User Administration in ServiceNow means **managing the people who use the system**.

It includes creating user accounts, giving them the right roles, putting them in groups, and making sure they can only access what they are supposed to.

It is managed mainly through the following table :

1. sys_user (Users)

This table stores all users in ServiceNow.

➡ Example: John, Mary, Admin.

2. sys_user_group (Groups)

This table stores groups/teams of users.

➡ Example: Service Desk, HR, Managers.

3. sys_user_role (Roles)

This table stores roles, which give permissions.

➡ Example: itil, admin, catalog_admin.

4. sys_user_has_role

This table stores which user has which role.

➡ Example: John → itil role.

Includes both:

- roles given directly to a user
- roles inherited from a group

5. sys_group_has_role

This table stores which group has which role.

➡ Example: Service Desk group → itil role

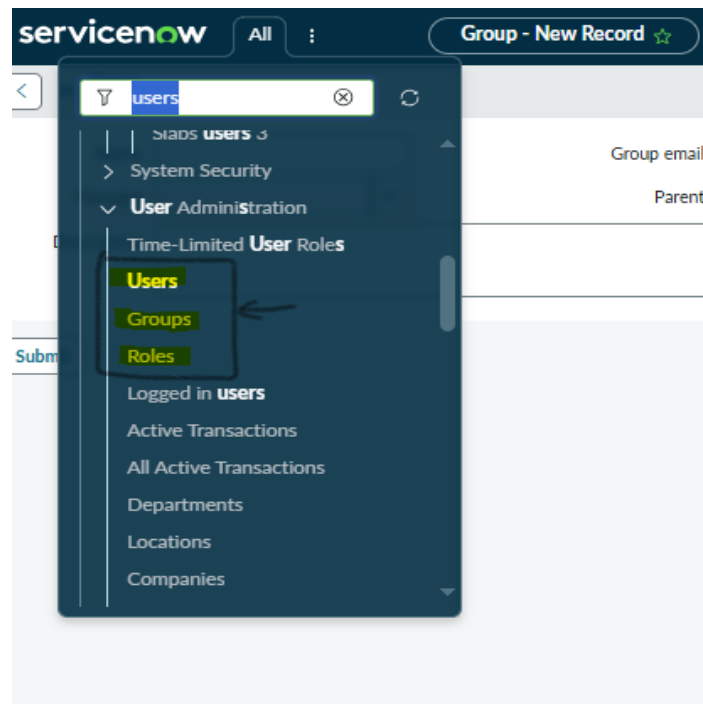

Every user in that group automatically gets the role.

Creating Users

Creating users in ServiceNow means adding new people to the system so they can log in and use the platform.

Steps

1. Go to **Users** (User Administration → Users)
2. Click **New**
3. Fill in user details (Name, User ID, Email)
4. Assign **Roles** (Edit → add needed roles)
5. Add to **Groups** (optional)
6. Click **Submit**.

after

The screenshot shows the ServiceNow 'User' form. Red numbers 1 through 8 are placed next to specific fields and checkboxes to highlight key attributes:

- 1.** User ID (text field)
- 2.** Department (lookup field)
- 3.** Password needs reset (checkbox)
- 4.** Locked out (checkbox)
- 5.** Active (checkbox, currently checked)
- 6.** Internal Integration User (checkbox)
- 7.** Time zone (dropdown menu)
- 8.** Email (text field)

Below the form fields, there are buttons for 'Update', 'Set Password', and 'Delete'. A section titled 'Related Links' contains links for 'View linked accounts', 'View Subscriptions', 'Reset a password', and 'SN UHIO Versions (0)'. At the bottom, a horizontal navigation bar includes tabs for 'Entitled Custom Tables', 'Roles', 'Groups', 'Delegates', 'Subscriptions', 'User Client Certificates', 'Projects of technovas', and 'skill to people mapping s'. An arrow points from the text 'related links to the user' to this navigation bar.

1.User Id - The login name for the user. it Must be unique. Example: **john.doe**

2.Department - User's department in the organizationReference to Department table.

3.Password reset checkbox

- If checked, the user must change their password when they next log in. it is Used to make sure the user creates a new, safe password.

4. locked out checkbox

- If checked, the user's account is locked and they cannot log in, it Usually happens after too many failed login attempts
- Admin can unlock by unchecking this box.

5.Active - Whether the account is active.Yes = user can log in; No = disabled.

6. Internal integration user checkbox

- If checked, the user is a special system account used for automatic processes or integrations between systems , Not a regular person who logs in.

7.Email -

Stores the user's email address.Used for:

- Sending notifications and alerts
- Communication within flows, approvals, and tasks

Example: john.doe@example.com

8.Time Zone -

Stores the user's local time zone.Used for:

- Displaying dates/times in the user's local time
- Scheduling notifications, reports, and workflows

Example: America/New_York

9.date format -

Stores how the user prefers dates to be displayed.Options include:

- MM/DD/YYYY → 12/05/2025
- DD/MM/YYYY → 05/12/2025
- YYYY-MM-DD → 2025-12-05

Helps show dates in user-friendly format on forms, lists, and reports

Working with Roles

A Role in ServiceNow defines what a user can do in the system.
It controls permissions like viewing records, creating tasks, or accessing modules.

Why Use Roles?

- Gives users **only the access they need**
- Makes it easier to manage **security and responsibilities**
- Can be assigned to **users or groups**.

Steps to Create a Role

1. Go to **User Administration** → **Roles** in the left navigation
2. Click **New** to open the Role form
3. Enter **Name** for the role (required)
4. Optionally, add a **Description** to explain what the role does
5. Click **Submit** to create the role.

The screenshot shows the ServiceNow 'Role - New Record' form. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', 'Admin', and a 'Role - New Record' button. A search bar is also present. The form itself has a 'Name' field (required, marked with a red asterisk) and a 'Description' field. The 'Application' dropdown is set to 'Global'. There is a checkbox for 'Elevated privilege' which is currently unchecked. A 'Submit' button is located at the bottom left of the form area.

1. Elevated Privilege - means the role has extra, powerful permissions.

When **checked**, this role is considered **highly sensitive** and can perform **critical or administrative actions**.

Usually used for roles that need **extra permissions**, such as:

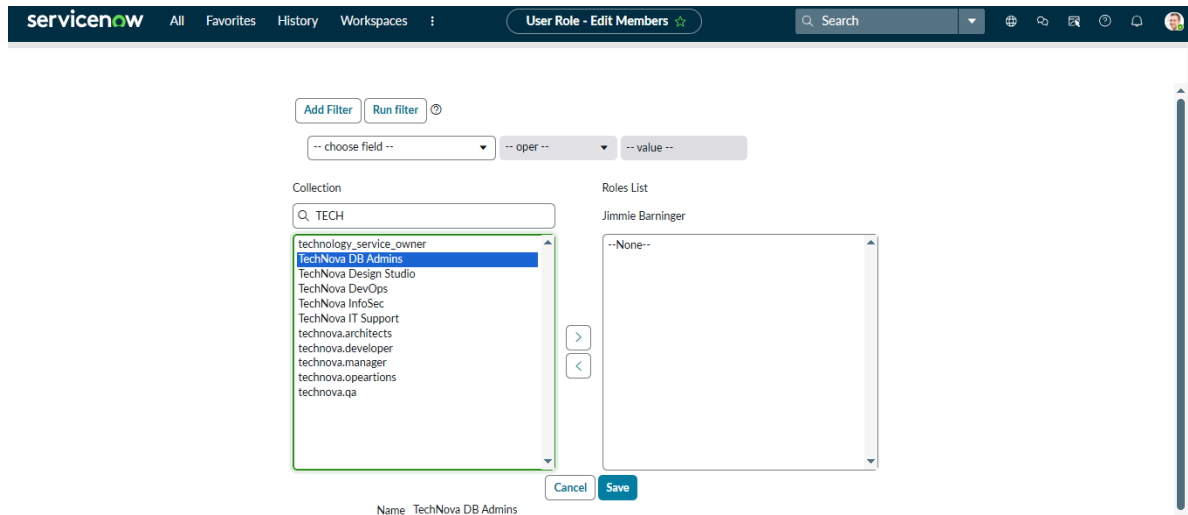

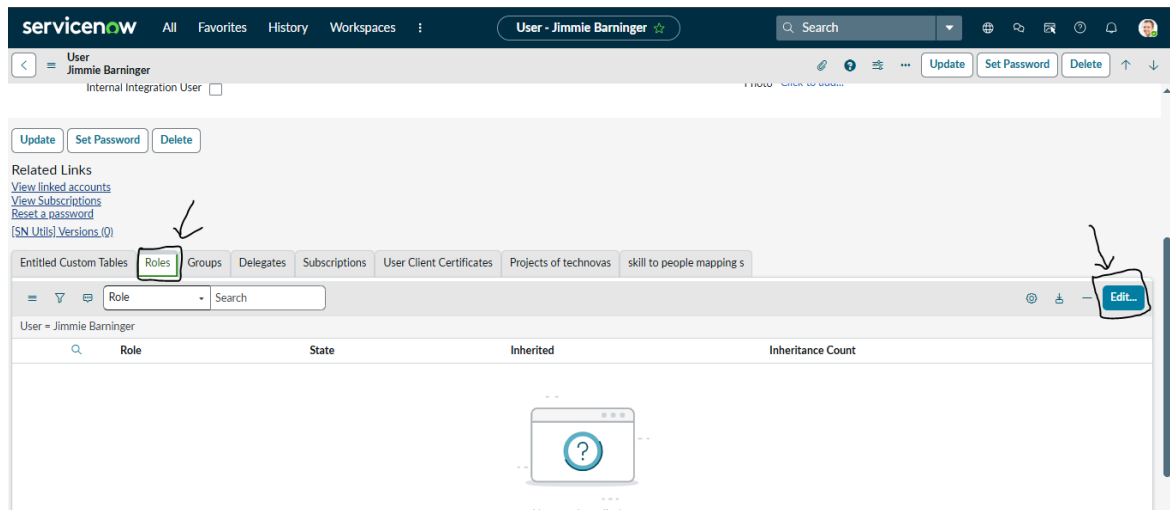

- Administering the system
- Changing security settings
- Managing user accounts

Assign Roles to Users

1. Navigate: User Administration → Users → ALL.
2. Open the user record you want to assign a role to.
3. Scroll to the Roles related list at the bottom.
4. Click Edit.

5. Select roles from the available list and Add them to the user.
6. Save: Click Save or Update.

The user now has access based on the roles assigned.

Working with Groups

Groups in ServiceNow are collections of users who share similar roles or responsibilities. They help organize users and make it easier to assign tasks, approvals, and permissions to many users at once.

Steps to Create a Group

1. Go to **User Administration** → **Groups** in the left navigation
2. Click **New** to open the group form
3. Fill in the **Group Name** and optionally **Description**
4. Add **Members** (users who will be part of this group)
5. Assign **Roles** to the group (optional, all members get these roles)
6. Click **Submit** to create the group.

The screenshot shows the 'Group - New Record' form in ServiceNow. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', 'Admin', and a 'Group - New Record' button. Below the navigation bar, there's a search bar and a 'Submit' button. The form fields are: 'Name' (filled with 'notes trail'), 'Group email' (empty), 'Manager' (with a search icon), 'Parent' (with a search icon), and 'Description' (empty). A 'Submit' button is located at the bottom left of the form.

1. Manager

- The **Manager** field is used to assign a **person responsible for the group**. This user usually **approves requests** or **oversees group activities**.
- Example: The Service Desk group can have the Service Desk Manager as the manager.

2. Parent

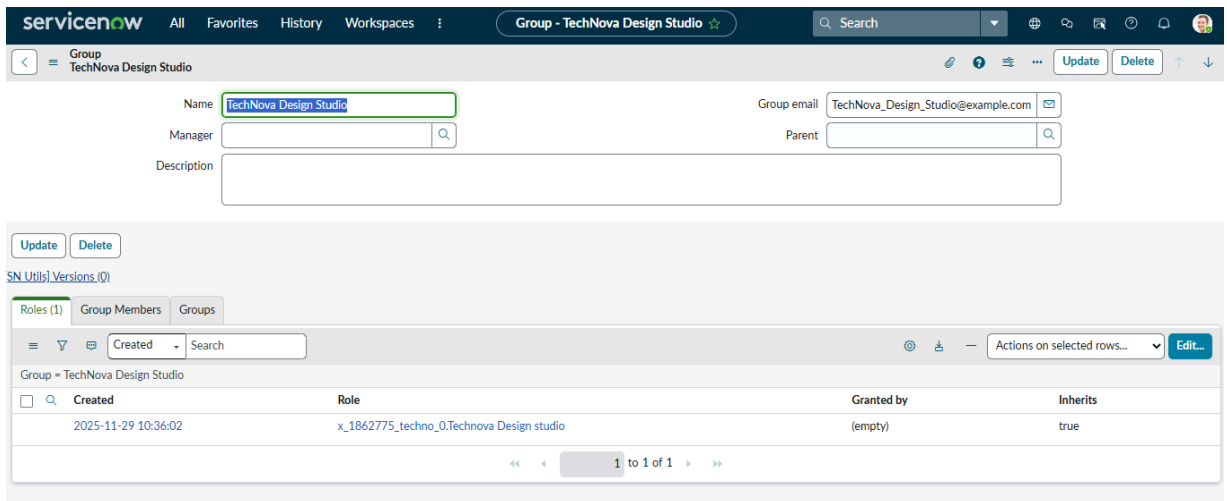

- The **Parent** field is used to place the group **under another group**. It Helps to create a **hierarchy of groups**.
- Example: "IT Support Level 1" group can have "IT Support" as its parent.

Assign Roles to Groups

Steps:

1. **Login** to ServiceNow as an admin.
2. **Navigate:** *User Administration → Groups → ALL.*
3. **Open the group record** you want to assign roles to.
4. **Scroll down** to the **Roles** related list.
5. **Click Edit.**
6. **Select the roles** you want to assign from the available list.
7. **Click Add** and then **Save** or **Update**.

All users in the group will now **inherit the roles** assigned to the group.

The screenshot shows the ServiceNow interface for a Group record titled "TechNova Design Studio". The record details include:

- Name: TechNova Design Studio
- Group email: TechNova_Design_Studio@example.com
- Manager: (empty)
- Parent: (empty)
- Description: (empty)

Below the details are "Update" and "Delete" buttons. The "Roles" related list is active, showing a table with the following data:

Created	Role	Granted by	Inherits
2025-11-29 10:36:02	x_1862775_techno_0.Technova Design studio	(empty)	true

The table has a pagination bar at the bottom showing "1 to 1 of 1".

Creating a Department in ServiceNow

1. **Navigate:** In the filter, type Departments → All.
2. **Click New.**
3. **Fill in details**
4. **Save:** Click Submit or Save.

Creating a Country

1. Navigate: **Countries** (under the user administration)
2. Click New
3. Enter details

4. Save: Click Submit or Save.

The screenshot shows the 'Country - New Record' form in ServiceNow. The form has a dark blue header with the ServiceNow logo and navigation links. The main form area is light gray and contains several input fields. On the left, there are three numbered fields: 1. Population (mil), 2. ISO Short, and 3. ISO Long. On the right, there are three numbered fields: 4. IANA Suffix, 5. UN Numeric, and an 'Active' checkbox. Below these is a 'User Experience Analytics' section with a field for 'Analytics Consent Policy'. A 'Submit' button is located at the bottom left of the form.

1. **Population (mil)**: A **numeric** field to store the country's **population**, likely measured in **millions** (e.g., entering "331" for the US implies 331 million people).
2. **ISO Short (ISO 3166-1 alpha-2)**: A **two-letter** code representing the country (e.g., **US** for United States, **CA** for Canada, **IN** for India).
3. **ISO Long (ISO 3166-1 alpha-3)**: A **three-letter** code representing the country (e.g., **USA** for United States, **CAN** for Canada, **IND** for India).
4. **IANA Suffix**: Likely related to the country's **Internet country code top-level domain (ccTLD)**, managed by the Internet Assigned Numbers Authority (IANA) (e.g., **.us**, **.ca**, **.in**).
5. **UN Numeric (ISO 3166-1 numeric)**: A **three-digit numeric** code representing the country, assigned by the United Nations Statistics Division (e.g., **840** for the US, **124** for Canada, **356** for India).
6. **Analytics Consent Policy**: A **reference/lookup** field that links this country record to a specific **data privacy policy** regarding the collection of User Experience (UX) Analytics. This ensures that any analytics collected from users in this country comply with the specified policy (e.g., GDPR, CCPA).

Creating a Location

1. Navigate: Type **Locations**(under User administration)
2. Click New
3. Enter details
4. Save: Click Submit or Save.

The screenshot shows the ServiceNow interface for creating a new location record. The top navigation bar includes 'servicenow', 'All', 'Favorites', 'History', 'Workspaces', 'Admin', and a 'Location - New Record' button. Below the navigation bar, the form is titled 'Location - New record'. The form contains the following fields:

- Name (text input)
- Street (text input)
- City (text input)
- State / Province (text input)
- Zip / Postal Code (text input)
- Country (text input with a dropdown arrow)
- Contact (text input with a search icon)
- Phone (text input)
- Fax phone (text input)
- Parent (text input with a search icon)
- Latitude (text input)
- Longitude (text input)
- Full name (text input)

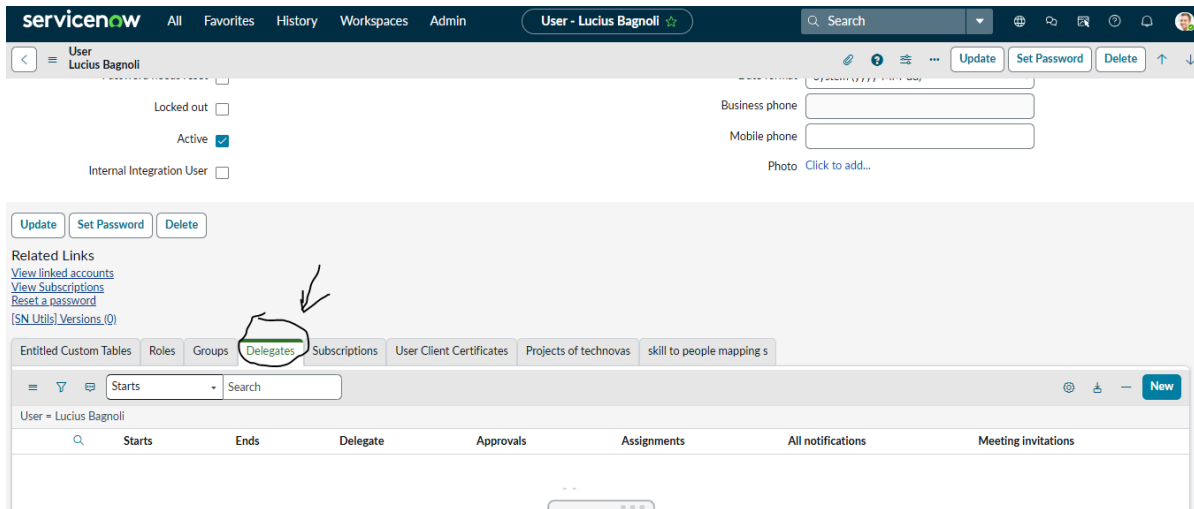

A 'Submit' button is located at the bottom left of the form.

Delegate Users in ServiceNow

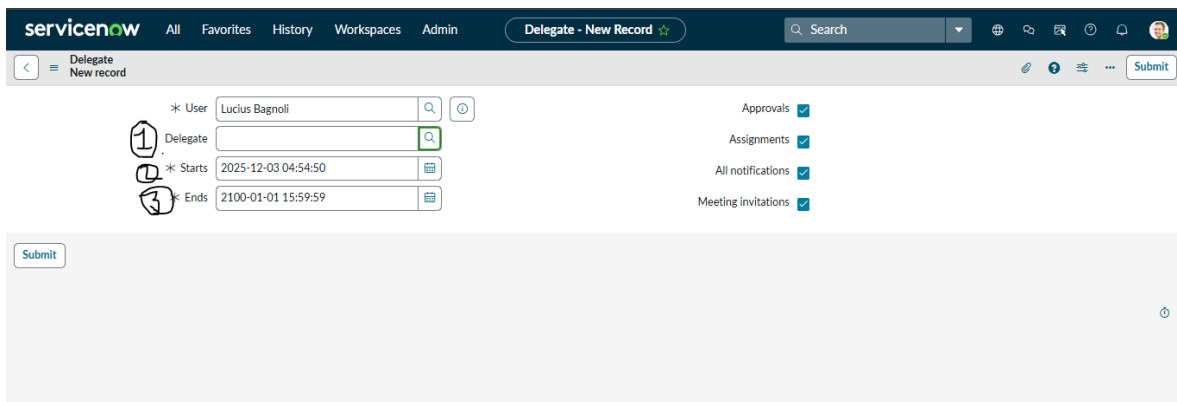

- Delegation lets a user temporarily give their tasks or approvals to another user.
- Useful when the original user is on leave, busy, or unavailable.
- The delegated user can act on behalf of the original user for approvals, tasks, or requests.
- Admins or users can set delegation periods with start and end dates.

Steps to Delegate a User

1. Go to **User Administration** → **Users**.
2. Open the **user record** of the person who wants to delegate their tasks.
3. Scroll down to the **Delegates** related list (usually at the bottom of the user form).
4. Click **New** in the Delegates related list.
5. In the **Delegate** field, select the user who will act on their behalf.
6. Set **Start Date** and **End Date** for the delegation.
7. Click **Submit** to save.

After that

1. Delegate : This is the person who is receiving the permissions and will act on behalf of the User. This is the delegate.

2 Starts : The date and time when the delegation becomes active (starts taking effect). The image shows a start date of 2025-12-03 04:54:50.

3 Ends : The date and time when the delegation expires and the Delegate no longer has the temporary permissions. The image shows a far future end date of 2100-01-01 15:59:59.

Current Logged in Users

This shows a **list of all users who are currently logged into the system.**

Useful for **tracking active sessions**, monitoring activity, or troubleshooting.

You can see details like:

- **User name**
- **Login time**
- **Session ID**
- **IP address** (sometimes)

How to Check Current Logged-in Users

1. Type “**Sessions**” in the search bar.
2. Go to **System Logs** → **Sessions** or **System Security** → **Active Sessions**.
3. You’ll see all **active users and their session details**.

User Preferences

User Preferences allow each user to **customize how the ServiceNow interface behaves** for them.

Users can **change settings** like:

- **Language**
- **Time zone**
- **Date format**
- **Number of rows in a list**
- **Theme or color scheme**

Preferences are **specific to each user**, so different users can see the system differently based on their needs.

How to Access User Preferences

1. Click your **profile avatar** in the top-right corner.
2. Select **Preferences**.
3. Change the settings as desired.
4. Click **Save** to apply changes.
